

Thank you on behalf of our family for the donation made in Bill Gibb's memory to the Alzheimer Society of Windsor and Essex County. There is so much to learn about Dementia and Alzheimer's and every penny that goes into research, treatment and prevention is incredibly important. By 2031 it is predicted that twice as many Canadians will be living with Dementia as are now. The number predicted by that year is 1.4 million and 2.8 million by 2050. Knowing what we know about the disease we find those predictions terrifying.

On a personal note we reached out to the local Alzheimer unit in the early days of dad's residency at Seasons. They provided information, counselling and subsidized care for dad. They also offer day programs to those still living at home.

Our dad, Bill, loved the town of Amherstburg and the County of Essex which was evident by the contributions and decades of service he offered to both. He would be grateful for your acknowledgement of his contributions and your generous donation in his memory.

Warm regards,,
Julie, Tina, Rusty
and our extended family
