To Whom It May Concern

Reference: Emergency Culvert Replacement on County Road 50 over West Townline Drain (C-50-060) in the Town of Essex, County of Essex, Ontario.

The purpose of this letter is to advise that the Culvert on County Road 50 (CR50) over West Townline Drain requires immediate replacement due to structural defects such as heavy corrosion, perforations, and loss of soil support material thus severely impacting on the remaining structural life of the culvert. The existing culvert structure experienced a culvert wash out during a rainstorm recently compromising the structural integrity of the structure. To maintain CR50 open for vehicular and pedestrian traffic, the County of Essex undertook emergency short-term repairs on this structure.

The County of Essex is planning to replace the existing culvert in the very near future with construction commencing on Monday August 9th, 2021 and completion slated for Friday September 3rd. During this period, CR50 at the intersection of CR41 will be closed for vehicular and pedestrian traffic in both directions.

The primary focus of this emergency structure replacement is to provide safe passage of vehicular and pedestrian traffic over the structure.

Stantec Consulting Ltd. is the Engineer of Record for this culvert replacement project. Should If you require additional information and/or clarification, please contact this office.

Sincerely yours,

Oliver Ng, P.Eng.
Senior Associate & Senior Structural Engineer
