

March 3, 2023

Good morning/afternoon,

Ontario is taking action to streamline and modernize its almost 50-year-old environmental assessment process that is too slow, unnecessarily burdensome and costly, to build Ontario while continuing to protect the environment. As part of this plan, we are making practical changes that would ensure strong environmental oversight while reducing delays to get shovels in the ground on projects that matter most to Ontario communities.

Today, on behalf of the Ministry of the Environment, Conservation and Parks, I am writing to let you know that the Municipal Class Environmental Assessment (EA) has been amended as part of the ministry's work on EA modernization.

Over the last three years, our modernization efforts have focused on ensuring strong environmental oversight while reducing delays on infrastructure projects that matter most to Ontario communities. This process includes considering input from stakeholders and Indigenous communities and streamlining requirements for low-risk municipal infrastructure projects, while maintaining strong environmental oversight and protection.

In 2019, the Ministry of the Environment, Conservation and Parks invited the proponents of class environmental assessments to review their assessment process and to propose changes to reduce duplication and better align assessment requirements with risk. We started consulting with municipalities, government agencies and Indigenous communities on the proposed amendments to the Municipal Class EA in 2020. I want to thank all who have offered feedback on the proposed amendments, through submitting comments, participating in webinars and correspondence. We have considered all comments received during the consultation, in addition to conducting our own analysis before the minister decided on the proposed amendments to the Municipal Class EA.

After careful consideration, the decision was made to approve many of the proposed amendments to the Municipal Class EA, including amendments proposed by the ministry. Various changes were made to the Municipal Class EA to update project schedules to better align the level of assessment with the environmental impact of the project. By looking at smarter, more modern ways of doing business, we're making sure important public services and infrastructure projects can get off the ground faster without unnecessary costs and delays.

Based on input received from Indigenous communities and Ministry of Citizenship and Multiculturalism (formerly the Ministry of Tourism, Culture and Sport) regarding the need to ensure the protection of archaeological resources and burial sites, an archaeological screening process will be required for various project types that are now eligible for exemption. The exemption will be conditional on the completion and outcome of the screening. The archaeological screening process consists of three questions with links to various tools and criteria developed under the *Ontario Heritage Act*. Proponents must carry out the specified research and consultation to accurately respond to each question, including consultation with Indigenous Communities, municipal governments, and Ministry of Citizenship and Multiculturalism, and may require the assistance of a licensed archaeologist. A project that the screening process applies to would not be exempt unless the archaeological screening process is completed as required, project documentation maintained and all mitigation measures that are identified through the screening process are implemented.

Please see Appendix 1 of the Municipal Class EA for more information on the new archaeological screening process.

Detailed information on the approved amendments to the Municipal Class EA, including the Minister of the Environment, Conservation and Parks' reasons for making the amendments, can be found at: <https://ero.ontario.ca/notice/019-5069>. The changes are effective as of the date of posting on the Environmental Registry of Ontario, March 3, 2023.

Proponents authorized to proceed with projects through the Municipal Class EA are required to proceed in accordance with the transition provisions set out in the amended Municipal Class EA, as it came into effect on March 3, 2023. Municipalities should review the amended Municipal Class EA to determine the impact on their project.

If you have any questions, please contact Stephen Deneault, Project Officer, by e-mail at: Stephen.Deneault@ontario.ca and the Environmental Assessment Modernization Team at: EAModernization.MECP@ontario.ca.

Sincerely,

A handwritten signature in black ink, appearing to read "A. Cross".

Annamaria Cross
Director, Environmental Assessment Modernization Branch
