

## STATEMENT FROM WINDSOR REGIONAL HOSPITAL

December 21, 2024

For Immediate Release

### **RFP Issued for Construction Manager to complete New Windsor/Essex Acute Care Hospital's First Phase, Including Key Infrastructure and Facilities**

A Request for Proposals (RFP) has been issued for a Construction Manager to complete and deliver the first phase of the New Windsor/Essex Acute Care Hospital, including a parking garage, an education, learning and administration building, and site works that will ensure required infrastructure is in place to support construction and provide onsite parking and workspace in future phases. Earlier this year, another RFP was issued for a Design Team to complete drawings for the build. A separate tendering process will be initiated at a later stage to complete the remainder of the project scope.

As this is an ongoing process, no further details will be shared until the contracts for a Design Team and Construction Manager are in place.

WRH is on track to have shovels in the ground for the new state-of-the-art acute care hospital by 2026, if not sooner. This milestone demonstrates progress in making the community's vision for the largest healthcare infrastructure investment ever in the region's history a reality.
