**TOWN OF TECUMSEH
STORM DRAINAGE MASTER PLAN
NOTICE OF PUBLIC INFORMATION CENTRE No. 1**

The Town of Tecumseh is completing a Storm Drainage Master Plan to address the impacts of surface flooding on the community. This Master Plan will confirm the factors contributing to surface flooding resulting from significant storm events, identify and evaluate alternative solutions to reduce the risk and impacts of surface flooding, and outline a recommended long-term implementation strategy.

This Master Plan does not directly address basement flooding resulting from sanitary sewer surcharging. The Town of Tecumseh has been addressing basement flooding risks separately through other studies, initiatives, and subsidy programs since 2010.

Your participation in this Tecumseh Storm Drainage Master Plan process will contribute to the results and help to develop suitable solutions that can be implemented in partnership with the community. Consultation is an integral part of this process and members of the public, agencies, Indigenous communities and other interested persons are encouraged to participate.

This **first** Public Information Centre (PIC) meeting has been scheduled to present the following:

- Learn more about the causes and factors being considered to address surface flooding;
- Preliminary results identifying the problem areas in the storm sewer and overland drainage systems;
- Identification and evaluation of alternative storm drainage solutions, including preferred regional solutions; and
- Next steps

The **first** PIC meeting is being held as follows:

Public Information Centre #1	
Date:	Wednesday, July 25 th , 2018
Time:	3:00pm to 5:00pm and 6:00pm to 8:00pm
Location:	Royal Canadian Legion Branch 261 12326 Lanoue St, Tecumseh, ON N8N 1N3

A second PIC meeting will be held in late 2018 to present a more detailed analysis of the recommended solutions for public and agency input. Visit the Town of Tecumseh website for updated information and resources related to this study and to provide additional input to the study team.

This study is being carried out in accordance with the Master Plan Approach No. 2 of the Municipal Class Environmental Assessment (EA) (Municipal Engineers Association, 2015) process. This study will fulfill EA requirements for Schedule B projects and satisfy Phases 1 and 2 of the process for Schedule C projects.

If you have any questions, please contact either of the project representatives:

Phil Bartnik, P.Eng.
Director, Public Works & Environmental Services
Town of Tecumseh
917 Lesperance Road
Tecumseh, Ontario, N8N 1W9
Ph: (519) 735-2184 ext. 148
Email: TecumsehDrainageMP@dillon.ca

Flavio Forest, P.Eng.
Project Manager
Dillon Consulting Limited
3200 Deziel Drive, Suite 608
Windsor, Ontario, N8W 5K8
Ph: (519) 948-4243 ext. 3233
Email: TecumsehDrainageMP@dillon.ca

All comments and information received from individuals, stakeholder groups and agencies regarding this study are being collected to assist the Town of Tecumseh in completing the Storm Drainage Master Plan. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act and with the exception of personal information, all information provided will become part of the public record. This notice is also available on the Town's website and social media accounts.
